PROFILE

Product Designer with extensive experience in customer experience, service operations, and behavioral research. Specializing in research-centered design, UX research, and experience optimization across digital and physical environments. Formally trained in product design through CareerFoundry's UX/UI program.

SKILLS

UX Design, UI Design, User Research, Wireframing, Prototyping, Design Systems, Interaction Design, Front-end Development, User Journey Mapping, Service Design, Usability Testing, Human-Centered Design, Behavioral Research, Data Analysis, Stakeholder Management, Cross-functional Collaboration

TOOLS

Figma, Adobe Illustrator, Javascript, HTML/CSS, GitHub, VSCode, Microsoft Office, Google Sheets, Canva

PROFESSIONAL EXPERIENCE

Front of House Manager - Clink Hostels 2024–Present

Optimized day-to-day customer service touchpoints in a high-volume environment. Redesigned operational workflows and implemented experience improvements, reducing staff turnover. Applied data-informed decision-making and created cross-functional processes that improved service efficiency.

Analyst - Smartgaming 2023–2024

Conducted research and data analysis to understand user engagement and risk patterns in digital environments. Translated insights into intervention strategies and experience improvements. Applied human-centered design methods and data-based decision-making.

Store Manager - Just Brands 2022–2023

Improved store experience and operational performance through data-driven sales and service strategies. Analyzed customer behavior and market trends to optimize engagement and outcomes. Led team development and service quality initiatives.

Assistant Manager - Hotel Lindrum 2019–2022

Managed multi-channel service delivery and improved customer experience across operational touchpoints. Optimized cross-departmental workflows and implemented service improvements based on customer insights. Led teams to improve efficiency and experience quality.

Front of House & Reservation Manager - Hotel Lindrum 2018–2019

Optimized service operations and improved customer interactions across front-of-house and reservations. Resolved complex user issues using human-centered problem-solving and supported process improvements.

Operations Supervisor & Accounting - Ibis Amsterdam 2014–2018

Improved operational workflows and service quality through process optimization and quality assurance initiatives. Streamlined internal communication and supported data-driven systems.

PRODUCT DESIGN PROJECTS

Expert - Mentorship Platform (UX/UI Product Design)

Designed a responsive platform connecting users with professionals for real-time guidance. Led user research, wireframing, interaction design, and prototyping to improve onboarding and communication flows.

Kubo - Digital Identity Vault Concept

A calm identity vault concept for organizing important documents; focused on clarity, confidence, and peace of mind.

Portfolio Website - Front-end Development

Designed and developed a responsive portfolio website to showcase product design work and case studies. Defined information architecture, user flows, and interaction design, and implemented the interface using frontend technologies.

EDUCATION

CareerFoundry - Product Design/UX/UI 2025–2026

Completed an intensive product design program focused on UX research, interaction design, and frontend development. Designed end-to-end digital experiences from research to high-fidelity prototypes and usability testing.

Roc van Amsterdam - Fashion Design 2008–2011

Studied fashion design, developing visual design skills through digital and analog sketching and concept development. Completed national and international internships in styling and production, collaborating with diverse stakeholders across the design process.
