### Profile

UX/UI and Product Designer with experience across user research, customer journeys, interaction design, prototyping, usability testing, and visual UI, backed by a background in behavioral analysis, customer experience, and service operations. I bring a strong analytical lens to design, combining qualitative feedback, behavioral patterns, and business context to understand where users get stuck and translate those insights into practical digital solutions.

### Core skills

| | |
|---|---|
| **Research & Analysis** | User research · Competitive analysis · Usability testing · Journey mapping · Behavioral analysis |
| **Design** | Wireframing · Prototyping · Interaction design · Design systems · Visual UI · Brand identity |
| **Collaboration** | Stakeholder management · Cross-functional collaboration · Data analysis |

### Tools

| | |
|---|---|
| **Design** | Figma, Adobe Illustrator, Framer |
| **Code** | HTML, CSS, JavaScript, GitHub Pages, VS Code |
| **Other** | Microsoft Office, Google Sheets, ChatGPT, Claude, Figma Make |

### Product design projects

**Expert** · On-demand Advice App

Designed a mobile app for booking a short session with a verified professional for one specific question. User interviews and affinity mapping surfaced two priorities: trust before booking and visible availability. Took the design through low, mid and high fidelity, tested it with six participants, and iterated on availability states and the post-session flow.

**Energy Check** · B2B Homepage Redesign, take-home assignment

Redesigned the homepage of a Dutch energy consultancy. Compared seven competitors and the existing site, and turned the gap between a warm, expert team and a formal website into five design moves. Designed two hero directions with written trade-offs, combined them in the final design, and delivered a desktop homepage and a small design system in Figma.

**MoodStream** · Emotion-Driven Media Platform

Created a streaming concept where users discover music and film through emotional state rather than genre. Explored alternative navigation patterns, immersive UI, and a scalable design system, using Figma Make and AI-assisted workflows during exploration and prototyping.

**Kubo** · Digital Identity Vault

Designed a low-friction concept for organizing passports, contracts, and IDs. Focused the experience on clarity, hierarchy, and confidence rather than the alarm-heavy patterns common in security products.

**Portfolio Website** · Design & Front-end

Designed, prototyped, and developed a fully responsive portfolio from scratch using HTML, CSS, and JavaScript. Planned the information architecture, interactions, animations, and responsive behavior before implementation and deployment on GitHub Pages.

## Professional experience

**Freelance UX/UI & Brand Designer** · Independent **2026 – present**

Developing brand identity, merchandise and packaging for a local coffee brand, working closely with the client to evolve the existing identity into a more coherent visual system and taking concepts through to production. Also designing a website for a second client, translating their brand and business needs into information architecture, responsive UI and visual direction.

**Front of House Manager** · Clink Hostels **2024 – 2026**

Led front-of-house operations and a team of 20+ in a high-volume Amsterdam hostel. Used guest feedback, recurring operational patterns, and team input to identify friction across the customer journey. Redesigned workflows across Front Office and Reservations, including handovers and onboarding, and coordinated improvements across departments. Changes to team structure, training, and processes contributed to reducing staff turnover from 132% to 50% within six months.

**Behavioral & Risk Analysis** · Smartgaming **2023 – 2024**

Analyzed user behavior, engagement patterns, and risk signals in a regulated digital environment. Combined behavioral data with direct customer interactions to understand changes in user behavior and assess individual cases. Translated recurring patterns into intervention strategies and practical recommendations, balancing customer protection, user experience, and regulatory requirements. Worked cross-functionally with Product and Compliance to improve customer outcomes.

**Store Manager** · Just Brands **2022 – 2023**

Managed day-to-day retail operations, staffing, stock, sales targets, and customer experience. Used sales data and direct observation to adjust merchandising and service approach across seasonal launches.

**Assistant Manager** · Hotel Lindrum **2019 – 2022**

Oversaw service delivery across reception, reservations, and F&B coordination at a boutique hotel. Reworked operational workflows as demand patterns shifted and led teams through significant industry disruption.

**Front of House & Reservations Manager** · Hotel Lindrum **2018 – 2019**

Led front desk and reservations and owned the guest journey from booking through check-out, resolving escalations and recurring friction between systems, processes, and customer needs.

**Operations Supervisor & Accounting** · Ibis Amsterdam Centre Stopera **2014 – 2018**

Supervised operations and daily accounting reconciliation, strengthening handovers and cross-department communication to keep customer-facing and internal processes running reliably.

## Creative industry experience

**Assistant Project Manager & Designer** · Romain Brau, Antwerp **2011**

Helped bring concept store RA13 from concept through opening and independently coordinated production and logistics for its public launch event, with direct client contact throughout.

**Assistant / Junior Art Director / Project Manager** · Bastiaan van Schaik **2010**

Coordinated creative production across two TV programs, a book launch, and a website launch. Managed timelines across creative, PR, and production teams, supported styling direction, and acted as liaison between studio, agencies, and designers.

## Education

**Product Design / UX/UI** · CareerFoundry **2025 – 2026**

Covered: UX Research, Information Architecture, Interaction Design, Responsive Design, Accessibility, Design Systems, Usability Testing

**Fashion Design** · ROC van Amsterdam **2008 – 2011**
