Profile

UX/UI and Product Designer combining hands-on design experience with a background in behavioural analysis and nearly ten years in customer-facing operations. I'm used to finding where people get stuck, understanding the behaviour or process behind it, and working across teams to improve the experience. My design work spans research, user flows, prototyping, usability testing, visual UI and design systems in Figma.

Core skills

Research & analysis	User research · Competitive analysis · Usability testing · Journey mapping · Behavioural analysis
Design	User flows · Wireframing · Prototyping · Interaction design · Visual UI · Design systems · Brand identity
Collaboration	Leading and coaching teams · Working with Product and Compliance · Direct client work

Tools

Design	Figma · Adobe Illustrator
Frontend basics	HTML · CSS · JavaScript · GitHub Pages · VS Code
Exploration	Framer · Figma Make · Claude · ChatGPT

Product design projects

Expert · On-demand Advice App

Designed a mobile app for booking a short session with a verified professional for one specific question. User interviews and affinity mapping surfaced two priorities: trust before booking and visible availability. Took the design through low, mid and high fidelity, tested it with six participants and iterated on availability states and the post-session flow.

Energy Check · B2B Homepage Redesign, take-home assignment

Redesigned the homepage of a Dutch energy consultancy. Compared seven competitors and the existing site, and turned the gap between a warm, expert team and a formal website into five design moves. Designed two hero directions with written trade-offs, combined them in the final design, and delivered a desktop homepage and a small design system in Figma.

MoodStream · Experimental Streaming Concept

Defined the concept, flows, mood-based navigation and interaction behaviour for a streaming app where you choose music and film by mood rather than genre. Directed and refined a working prototype in Figma Make through several iterations. Not user-tested.

Kubo · Mobile Document Vault

Designed a mobile concept for keeping passports, contracts and other important documents in one calm place, with a flat structure, search on the home screen and expiry reminders. Not yet tested with users.

Portfolio Website · Design & Build

Designed and built my portfolio site with HTML, CSS and JavaScript, using AI as a coding partner. Planned the information architecture, interactions, motion and responsive behaviour, and published it on GitHub Pages.

Professional experience

Freelance UX/UI & Brand Designer · Independent — **2026 – present**

- Working directly with small-business clients across brand and digital design.
- Evolving an existing coffee brand into a more coherent visual system across identity, packaging and merchandise, from early direction through production.
- Designing a responsive website for a second client, translating business needs into information architecture, visual direction and UI.

Front of House Manager · Clink Hostels — **2024 – 2026**

- Led and coached a team of 20+, using guest feedback, recurring operational issues and team input to improve handovers, onboarding and collaboration between Front Office and Reservations.
- Introduced AI-assisted workflows for responding to guest reviews and emails across internal and third-party systems.
- Changes to team structure, training and processes contributed to reducing staff turnover from 132% to 50% within six months.

Behavioral & Risk Analysis · Smartgaming — **2023 – 2024**

- Analysed behavioural data, engagement patterns and direct customer interactions to identify changes in user behaviour and risk in a regulated digital environment.
- Turned recurring patterns into intervention strategies and practical recommendations, balancing customer protection, user experience and regulatory requirements.
- Worked with Product and Compliance on customer outcomes.

Store Manager · Just Brands — **2022 – 2023**

- Used sales data and direct observation to adjust merchandising and service approaches across seasonal launches.

Assistant Manager · Hotel Lindrum — **2019 – 2022**

- Oversaw service delivery across reception, reservations and F&B at a boutique hotel.
- Adapted workflows as demand changed and helped the team adopt new ways of working.

Front of House & Reservations Manager · Hotel Lindrum — **2018 – 2019**

- Led front desk and reservations, responsible for the guest's stay from booking through check-out.
- Worked across departments to resolve escalations and recurring friction between systems, processes and guest needs.

Operations Supervisor & Accounting · Ibis Amsterdam Centre Stopera — **2014 – 2018**

- Strengthened handovers and cross-department communication between customer-facing operations and back-office processes.

Creative industry experience

Assistant Project Manager & Designer · Romain Brau, Antwerp — **2011**

Helped bring concept store RA13 from concept to opening and independently coordinated production and logistics for its launch event, with direct client contact throughout.

Assistant / Junior Art Director / Project Manager · Bastiaan van Schaik — **2010**

Coordinated production for two TV programmes, a book launch and a website launch, working between the studio, PR agencies and designers, and supported styling direction.

Education

Product Design / UX/UI · CareerFoundry — **2025 – 2026**

Covered: UX research, information architecture, interaction design, responsive design, accessibility, design systems, usability testing

Fashion Design · ROC van Amsterdam — **2008 – 2011**
